

# Care-North *plus* – The Policy RECOMMENDATIONS!

*“Promote healthy and sustainable mobility by supporting walking and cycling.”*

***"Foster a new mobility culture and support its implementation. "Use it. Don't own it."***

***“Don’t expect miracles from alternative fuels. E-mobility alone is not going to solve our mobility challenges in the future.”***

*“Be open to new mobility trends such as autonomous transport and convert these into opportunities for sustainable mobility.”*

***“Strengthen public involvement in the planning and decision-making processes by taking the opinions of citizens seriously.”***

***“Entice citizens and stakeholders to change their behaviour by using peer-to-peer examples.”***

***“Enable transparent pricing and be honest about who pays the final bill.”***

***“Decouple the notion of economic prosperity from transport growth and think about sustainable solutions instead.”***

***“Integrate transport into spatial planning by using integrated tools and models.”***

***“Create holistic planning solutions through aligned planning and decision making.”***

*"... supporting walking and cycling..."*

*"... Use it. Don't own it..."*

*"... E-mobility is not alone the solution ..."*

*"... new mobility trends ... autonomous transport ..."*

*"... Strengthen public involvement ..."*

*"... Change behaviour by using peer-to-peer..."*

*"... Enable transparent pricing ..."*

*"Decouple ... economic prosperity from transport growth ..."*
